

To open a module from a .zip file:

1. In your email, right-click the .zip file and save using "Save As..." (I recommend to your desktop for convenience)

2. Right-click the downloaded file this is on your desktop, and click "Extract All". When the dialogue box comes up, click Extract.

| Name | Date modified | Type | Size |
|---------------|------------------|---------------------|--------|
| story_content | 8/1/2013 3:29 PM | File folder | |
| meta.xml | 8/1/2013 1:43 PM | XML Document | 1 KB |
| story.html | 8/1/2013 1:43 PM | HTML Document | 5 KB |
| story.swf | 8/1/2013 1:43 PM | Shockwave Flash ... | 223 KB |

3. Open the folder (you may have a second folder you have to open as well) and then double-click on story.html. The module will then play in your browser.
